An Introduction to Dynamic Governance

with author and speaker *John Buck*

Dynamic Governance, also known as **Sociocracy**, is a consensus-building tool that revolutionizes the way you and your group develop ideas, implement solutions, and reach goals!

What is Sociocracy?

- It makes meetings more enjoyable and the decision-making process appealing, easy, and fast
- It allows your group or enterprise to greatly increase its effectiveness and success
- It is used by organizations in Europe, Australia, India, Canada, and the U.S.
- It far exceeds majority rule's ability to foster community and goodwill

This event is co-sponsored by
Sustainable Ballard & Next Step Together
and will feature introductions
to both organizations
